DES 421-001

by: Noah McGrew

Table of Contents

01 .Lighting Specifications

Includes lighting specifications used throughout the library, emphasizing sustainability, daylight harvesting, and wellness-focused design. Fixtures are selected to support function, comfort, and atmosphere across public and private spaces.

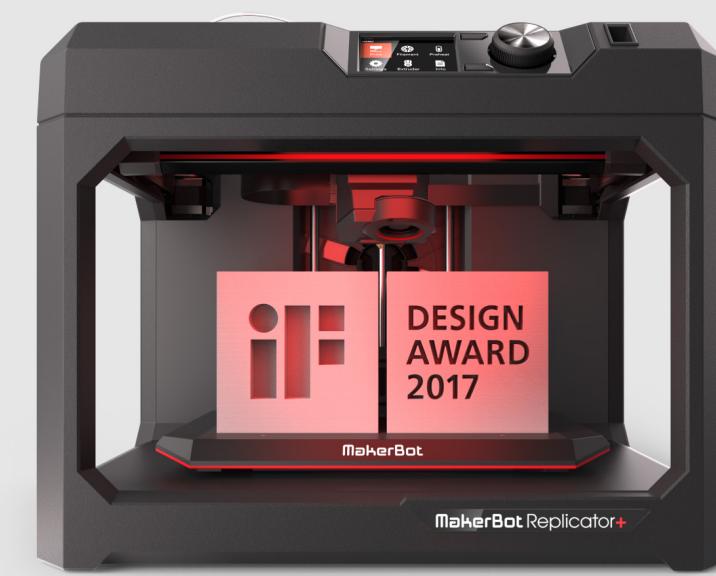

02. Furniture Specifications

Includes all key furnishings for the library's spaces—from lounge seating and cafe chairs to collaborative workstations. The furniture selections support flexibility, accessibility, and community use while aligning with the design concept of Nature & Knowledge.

03. Finish Specifications

Includes all materials and finishes that contribute to the sensory and visual identity of the library. Selections reflect elements to create a warm, inclusive, and durable environment suited for a wide range of users.

04. Equipment Specifications

Includes specifications for all essential equipment, including digital tools, makerspace machines, storage systems, and display units. Equipment was chosen for its durability, function, and relevance to the library's programming and user needs.

05. Room List Cost - Calculating the cost of one room (The Makerspace)

A breakdown of costs associated with furnishing and equipping one typical room: the Makerspace. This includes itemized pricing for tools, furniture, and lighting to estimate a realistic budget for this creative, high-use environment.
